

COVID-19 Support & Services+

Integrated Solutions Consulting (ISC) provides “On-Call” disaster planning, management, response and recovery services to various communities and their departments, offices, and agencies across the nation. Services may include but are not limited to, your community’s response and recovery efforts related to the COVID-19 pandemic and any other emergency conditions that may put at risk life, health, safety, and essential public services.

Many leading public health and medical experts have warned of an imminent second wave. Even before then, as social distancing restrictions are relaxed and people return to work and school, the infection will spread, despite even the most careful precautions. Response activities will need to continue alongside recovery, with various interventions taking place in coordination with efforts to return to normalcy.

The following scope of services outlines a likely scenario in which our communities will need to adapt and thrive in an era of uncertainty and disruption. While the next 12 to 18 months is unknown, what is known are the likely operations and capabilities needed to prepare for, respond to, and recovery from COVID-19.

This document is provided to demonstrate Integrated Solutions Consulting’s (ISC) comprehensive support and services during this unprecedented crisis. Contracting with ISC is easy, and a number of pre-established contract vehicles can be utilized to facilitate the procurement process.

EMERGENCY CONTRACT VEHICLES:

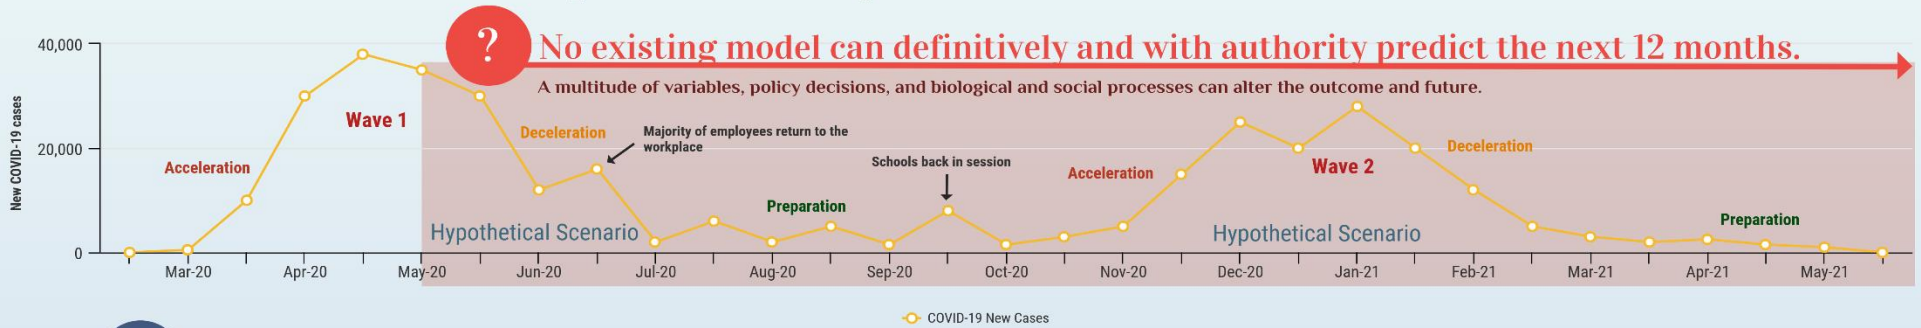

- **PRODUCTS:** EP11-17: Emergency Preparedness & Safety Equipment and Software
- **SERVICES:** EP10-17: All Hazards Preparedness, Planning, Consulting & Recovery Services

INTEGRATED SOLUTIONS CONSULTING

Integrated Solutions Consulting (ISC) assists organizations in developing and sustaining a Comprehensive Emergency Preparedness, Response, and Recovery Program. ISC has a demonstrated history of providing the public health and medical sector with professional consulting services and a complete platform of independent but integrated web-based tools that are designed to assist planning and preparedness professionals. ISC offers a suite of innovative solutions (Odysseus Enterprise System) to assist your organization for today’s challenges.

COVID-19 | An Operational Framework

An Operational Focus: What we do know, and what we can anticipate.

Past pandemics and the collective expertise of scientists and experts across the world agree a "Second Wave" is likely, and that certain biological, social, and political factors and interventions may result in the increase and/or decrease of new cases. Although the timing of the "Second Wave" or potential severity of the pandemic is unknown, and influenced by a multitude of factors, what we can anticipate are the essential operations to prepare for, respond to, mitigate, and recover from COVID-19. The actual scenario, however, will influence the timing (i.e. when the operations are needed) and the effort to support the operation(s).
